JOSEF DOORNINK

Site Reliability Engineer | AI Infrastructure & MLOps

Portland, OR | jdoorarg@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

A creative problem-solver who loves building the infrastructure that brings ideas into reality. An engineer with 10+ years experience, 10 peer-reviewed papers, 2 US patents, a major design award and FDA-cleared hardware. That foundation now drives deep SRE and AI infrastructure work (CKS/CKA certified), delivering systems with integrity and observability at scale - currently designing autonomous Agentic SRE pipelines that leverage LLMs for root-cause analysis.

TECHNICAL SKILLS

Core Technologies: Kubernetes (AKS) | Docker | Terraform | Azure | AWS | GCP | Helm | YAML | Python | Go/Golang | Bash | C# | SQL | Kafka | Redis | ElasticSearch

AI/ML Engineering: LLM Model Serving | ML Pipelines | Distributed Training Systems | Azure Machine Learning | Vertex AI | Drift Detection | Model Finetuning Systems

Observability & SRE: New Relic | Azure Monitor | Distributed Tracing | CI/CD Pipelines | GitHub Actions | Performance Profiling | Incident Response | Prometheus | Grafana | Azure DevOps

PROFESSIONAL EXPERIENCE - STARTUP

Lead MLOps Engineer

Reason Benefit AI Corporation | Remote | October 2025 - February 2026

- Architect and maintain large-scale Azure Kubernetes Service (AKS) production environment for ML model training and serving, supporting distributed model inference at scale.
- Integrate with observability frameworks for model performance tracking, latency monitoring, and resource utilization across distributed training systems.
- Collaborate with research teams to translate experimental model architectures into production-ready systems with focus on reliability and scalability.
- Led Distributed Training Pipeline Optimization by profiling RL (Reinforcement Learning) pipeline bottlenecks by introducing automated pipeline scripts and validations to improve training cycle time.

PROFESSIONAL EXPERIENCE

Lead Site Reliability Engineer (SRE) I -> II -> III

Trimble | Remote | January 2019 - Present

- Architected AKS production environments handling 10M+ requests/day across 30+ microservices at 99.9% uptime SLA.
- Built automation tooling in Python and Go eliminating 80+ hours/month of toil and accelerating deployment velocity 3x.
- Developed yaml-based ML pipeline orchestration tools, reducing manual overhead by 70%.
- Reduced P99 latency 45% and improved throughput 60% through systematic profiling of distributed systems.
- Developed Go CLI tooling (Cobra) adopted by 50+ engineers for streamlined infrastructure workflows.
- Implemented New Relic observability stack with distributed tracing, cutting MTTR by 50%.
- Led Kubernetes capacity planning and strategies supporting 200% traffic growth.
- Built CI/CD pipelines (GitHub Actions, Azure DevOps) with automated testing and rollback mechanisms.
- Managed 500+ cloud resources via Terraform IaC; implemented CKS security controls for SOC2 compliance.

Software Developer

Viewpoint | Remote | March 2018 - January 2019

- Developed cloud-based SaaS applications using .NET and Angular, migrating on-premise software solutions to Azure cloud platform.
- Built RESTful APIs for multi-tenant applications serving thousands of users with focus on performance and scalability.

Software Developer I

Onfulfillment | Remote | March 2014 - March 2018

- Engineered multi-tenant e-commerce platform using Microsoft Stack (.NET, C#, SQL Server) integrated with third-party SaaS APIs.

- Led 'uplift' initiative migrating legacy codebase to modern greenfield platform, improving response times by 40% measured through New Relic APM.

Biomechanical Research Engineer II
Legacy Biomechanics Research Lab | Remote | 2007 - 2013

- Lead test and development engineer for NIH-funded multimillion-dollar research project focused on bone fixation solutions.
- Managed successful implant creation, delivery, and test methodology producing multiple US FDA-approved implants.

KEY TECHNICAL PROJECTS

K8gentS (2025)

- An autonomous Root Cause Analysis (RCA) agent designed specifically for Kubernetes clusters. Leverages LLM logic and system telemetry to automatically diagnose pod failures, resource exhaustion, and network bottlenecks, drastically reducing operational MTTR and increasing visibility.

OmniSight-Core (2025)

- A production-grade video search engine capable of understanding semantic queries (e.g., "Find a red truck at night"). Demonstrates self-healing infrastructure that automatically detects model performance decay and triggers retraining.

CERTS/COURSES

- **CNCF Certified Kubernetes Security Specialist (CKS)** | CNCF | March 2024
- **CNCF Certified Kubernetes Administrator (CKA)** | CNCF | June 2021
- **Machine Learning Specialization** | Stanford / Coursera | September 2025
- **HashiCorp Certified Terraform Associate** | HashiCorp | July 2022
- **Microsoft Certified Azure Developer Associate** | Microsoft | August 2019
- **Production Machine Learning Systems** | Google Cloud / Coursera | April 2026

EDUCATION

Master of Science, University of California, Davis | 2006

Bachelor of Science, Mechanical Engineering, California State University, Chico | 2003

PATENTS & AWARDS

Bone screw with multiple thread profiles for far cortical locking and flexible engagement to a bone (US9314286B2)

- A bone screw including a head, a shaft, and a tip. The shaft includes a first threaded section, a second threaded section, and an unthreaded section positioned between the first and second threaded sections. Designed to enable dynamic fixation.

Bone screw with multiple thread profiles... (US8740955B2)

- Original patent formulation for the orthopedic implant enabling far cortical locking via a flexible-engagement thread profile.

Scientific Exhibit Award of Excellence

- Awarded at the American Academy of Orthopaedic Surgeons (AAOS) 2010 Annual Meeting for the landmark exhibit: 'Effects of Construct Stiffness on Healing of Fractures Stabilized With Locking Plates' (Bottlang M., Doornink J., Fitzpatrick DC, Marsh JL, Augat P., von Rechenberg B., Lesser M., Madey SM).
